

White Label Mobile App

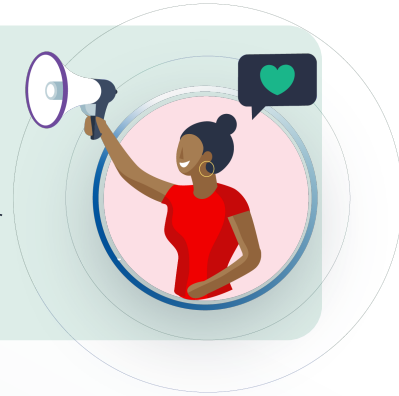

Your own advocacy app in the App Store & Play Store is now available for iOS and Android. Unify your ambassadors' experience and bring your company's branding everywhere, from desktop to mobile.

Advantages

Strengthen your brand

Your company stands for something, you have values. Show off your pride and solidify your brand by bringing it to your employees' smartphones, and add your logo as app avatar.

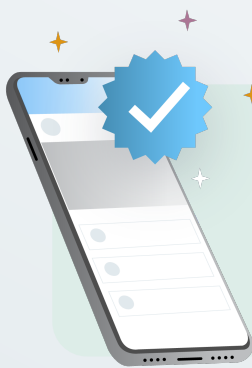

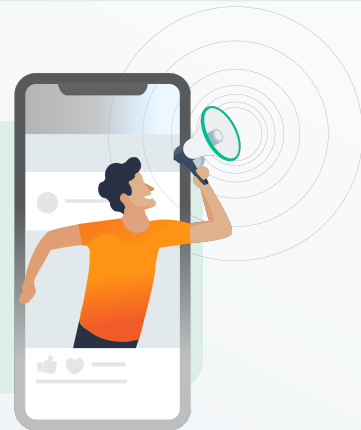

All-in experience

Show your ambassadors that you're committed to the program by unifying and personalizing their experience with your exclusive brand.

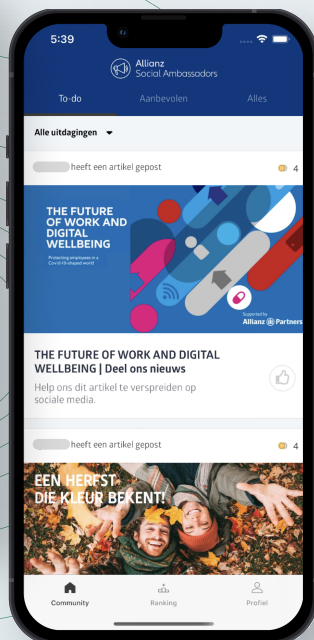

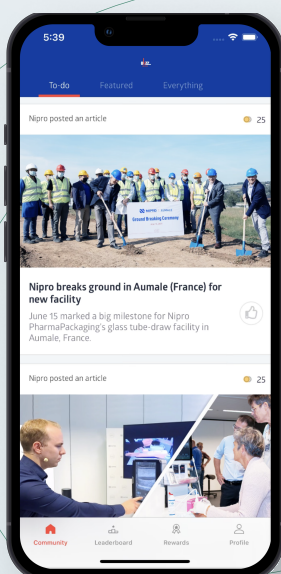

Easy to promote

Lower the threshold to find and install the app for your employees: with your proprietary app name, finding the app will be much easier.

Reduce login steps

No URL is required during the log-in process, which means fewer barriers for your ambassadors to get started.

The Whitelabel Mobile App is not included in our standard licenses. If you are interested, please contact us for more information.
